ABC Window Systems
1455 Columbia Ave.
Riverside, CA 92507

Attn: Stephen Schwartz

Dear Mr. Schwartz,

Per your written request, you are hereby granted a certification extension for production of dual-glazed, Tin Plate Steel sealed insulating glass assemblies constructed at your Riverside, California production facility.

Previous test results and on-going random inspection of both materials and assembly practices indicate that no changes have been made to the construction of these sealed insulating glass assemblies that may adversely affect finished construction performance.

Assemblies of similar construction to what was described in Intertek B&C report L5365.01-301-28 are currently in test, the results of which shall be forwarded to Associated Laboratories, Inc. for evaluation upon completion of testing. This waiver shall remain in effect until these specimens' test results are evaluated and approved for continuing certification, or until February 11, 2024, whichever comes first.

Sincerely,

Ken Ness
Associated Laboratories, Inc.
